

# SAFIRA

TECNOLOGIAS DE INFORMAÇÃO

## BUSINESS SOLUTIONS

**SAFIRA is highly reputed for its technical expertise, focus in meeting defined business requirements, and ability to deliver to the most demanding challenges. In our Custom Business Solutions service is where all of our practices come together to exceed your expectations for building custom systems and applications, on-time and on-budget.**

**We've built mission-critical custom business solutions for several major players on the national and international markets. The best proof of our customer's satisfaction is the repeated usage of our services.**

### Practices

SAFIRA gathers a set of best practices from industry experts and consistently applies them in its projects to substantially enhance the overall delivery quality. These practices are enforced by our skilled and experienced senior staff of Consultants, Architects and Analysts.

### Methodology and Processes

SAFIRA internally developed its own solutions process framework that defines processes and methodologies that ensure your projects success. This framework regulates in-project Software Development, Project Management, Change Management, Configuration Management, Risk Management and Quality Assurance processes.

### Technology

We bring you exclusive technology in our custom development services. The same technology we build into our Enterprise Architecture Solutions. This provides a solid foundation and a significant jumpstart to custom build solutions. Through our alliances with industry leading technology vendors, we offer a broad set of options for technology and platform choice for your solutions.

### Effective team structure

Our in-project team assembly gathers the best available talent mix for the project at hand. The team organization precisely balances lightness to avoid redundant and less cost-effective roles, and still remains effective in ensuring fluid communication and work flow.

### Technical fitness

Our team of Software Engineers is thoroughly trained and deeply knowledgeable of software development practices and of or partner's technologies. Safira Academy, our training department, defines per-career rigorous and demanding training plans that encompass recognized industry certifications such as PMI's PMP, Microsoft's MSAD, MCSD and MCSE, CompTIA A+, Sun's SCPJ2P and SCDJ2P Beyond IT vendors official training our Engineers frequently attend international renowned events, such as Tech-ed, and in-depth courses of acclaimed independent trainers such as DevelopMentor.

### ABOUT SAFIRA

SAFIRA develops solutions and provides IT services to leading companies in the national and international market. We provide engineering services to advise, audit, architect, conceive and manage IT systems that support the companies' business. Founded in 1997, SAFIRA has more than 50 active customers and a team of 120 highly qualified professionals.
