

Agile Platform™

Deliver custom web & mobile apps, the better way

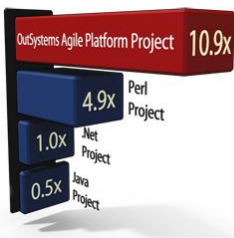

The Agile Platform™ is a complete web application development environment that allows you to build and change enterprise web and mobile apps faster, on a standard .Net or Java architecture, without locking you into proprietary technology.

Build and manage web and mobile apps of any complexity with ease.

The Agile Platform gives you all the tools you need to effectively deliver the applications your business needs, all within a complete and integrated development and management environment. On premise, in the cloud or a combination of both.

What will it do for me?

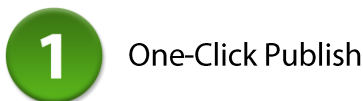

> Develop and change applications with incredible speed and minimal training

Recent research shows that project teams building applications with the Agile Platform are on average 10.9x faster than when developing with standard technologies. Isn't it time you started delivering faster?

> Develop rock solid and secure apps easily, and deploy them in minutes

The Agile Platform lets you focus on the needs of the business and takes care of making sure your applications are scalable, secure and ready to roll. One-Click publishing gets your apps to production in minutes.

One-Click Publish

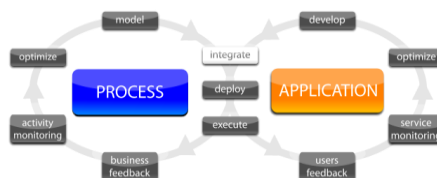

> Integrate and extend your existing apps using your technology standards

The Agile Platform makes it easy to integrate your legacy apps and databases. With pre built integrations for popular packages and wizards for migrating legacy databases, integrating and extending existing apps is a breeze.

> Manage the entire life cycle of your apps using one unified environment

The agile platform lets you manage the full lifecycle of delivering business process and enterprise web applications. Our unified application development and BPM capabilities makes sure your business is always up to date.

"Adopting OutSystems' Agile Platform and Methodology resulted in the fastest application development project ever for this company."

Stephen Meier, AD of Software Development at XDx Inc.

"OutSystems championed an innovative approach with an advanced platform that can significantly improve the time to market and quality of business applications."

Michael Azoff, Senior Research Analyst at Butler Group

Cloud Ready!

The Agile Platform lets you build your apps in the cloud or on-premise with no lock-in! Use our PaaS offering, your own IaaS or private cloud infrastructure.

Your Agile Platform apps will be based on standard stacks, free from proprietary technology, and can easily be moved from provider to provider.

Go Mobile With Ease

Stop worrying about building apps for multiple mobile platforms.

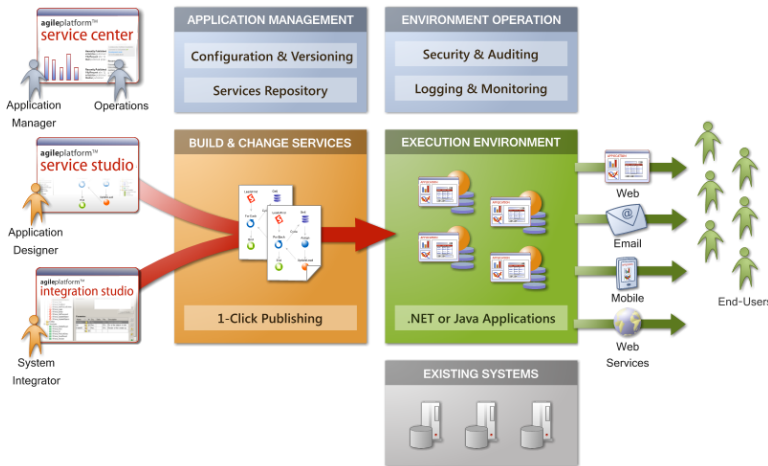

Instead, use the Agile Platform to create universal apps that will work across all mobile platforms and integrate with all of your business systems.

The Agile Platform eliminates all the technology headaches of building mobile applications and makes moving your business to the road fast and easy.

So, how is it done?

Web App Development, Management & Change. One Platform.

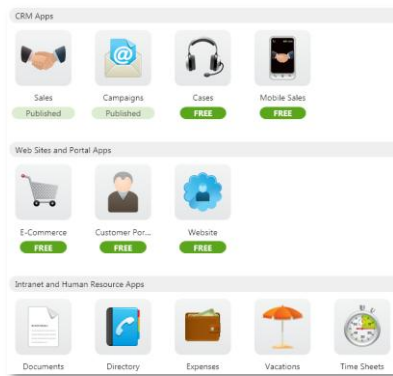

The Agile Platform is a complete solution that covers the entire life-cycle of web applications and business processes. You can integrate, develop, deploy, manage and change your enterprise web and mobile applications using the same toolset – saving time, money and a lot of headaches!

What will I find in the Agile Platform?

- **End-to-end Visual Delivery**
Assemble, compose, and change web & mobile business applications visually. User interface, data models, business rules, scheduled processes, web services, and integration adapters can be created and changed with drag-and-drop.
- **Rich Web Business Applications**
The Agile Platform natively supports Ajax to help you deliver rich Web 2.0 and HTML5 compliant business applications.
- **Embedded Change Technology**
Built in collaboration encourages business users to submit feedback directly on the application's interface, simple and easy.
- **1-Click-Publishing**
New applications and versions are automatically validated and deployed with zero downtime, even across server farms and clusters. Making your changes fast and risk free!

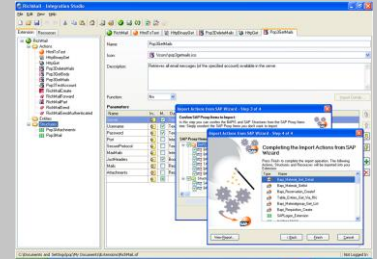

Easy to get started!

- **Never Start with a Blank Page**
Free to use, true *open-source* apps let you learn fast and never start with a blank page.
- **Built In Tutorials & Free Training**
The Agile Platform and each free app comes with a built in, guided tutorial to help you get started. We also offer free on-line training and full classroom education.

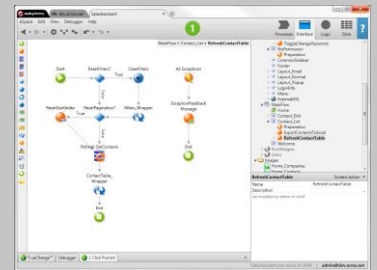

apps@outsystems gives you free, open source apps to kick-start your development projects.
